## Biocontrol Workshop for Noxious Weeds Canada Thistle and Field Bindweed

Free Outdoor, Socially Distanced Workshop

**Organic Agriculture Research Station Rogers Mesa**  
**30624 Highway 92, Hotchkiss 720-320-8072**  
**May 20, 2021 9:00AM**

Colorado Department of Agriculture (CDA) promotes the use of biological control in pest management as a tool to control noxious weeds. Speakers Karen Rosen (Canada thistle) and Nina Loudon (field bindweed and tamarisk) are biological control specialists for the CDA, Palisade Insectary. Join us at the research station to learn what biological control agents are currently available and what they can do for your noxious weed problems. No RSVP necessary.
